

Dear Ladies and Gentlemen,

On behalf of ITE, I welcome participants and guests of Moscow International Automobile Exhibition “Motor Show”.

The automobile industry is a leading sector of machine building affecting economic and social development of Russia and providing for about 1% of the GDP.

Car manufacturing is carried out in close cooperation with companies of electrical, metallurgical, chemical, electronic, light and other industries. Thus, car manufacturing provides for employment of about 4.5 mln. persons.

Motor Show for many years has been the key business forum aimed at specialists of the industry. The exhibition provides for development in Russia of high-tech production facilities for manufacturing of car components and spare parts, contributes to effective partnership of Russian car manufacturers and developers and international automotive industrial groups, which, in turn, stimulates development of new facilities and modernization of existing plants in Russia.

Motor Show is held under the active support of state authorities and professional associations. In view of the above, I would like to express my gratitude to the Committee of the State Duma of the RF for Industry, Committee of the State Duma of the RF for Transport, Moscow Government, Ministry of Transport of the RF, Ministry of Transport of Moscow Region and Moscow Association of Entrepreneurs for their support in organising this professional forum.

From the bottom of my heart I wish participants and guests of the exhibition productive work, new reliable partners and financial prosperity.

General Director
ITE LLC Moscow
