

Welcome Letter of the Association of European Business
to Participants and Guests of the International Exhibition
“Motor Show: MIMS-2010 powered by Automechanika Moscow”

I welcome participants and guests of the International Exhibition “Motor Show: MIMS-2010 powered by Automechanika Moscow”.

For many years Motor Show has been the main platform for demonstration of the latest products of the car components and spare parts market. This year for the first time Messe Frankfurt (Germany) has become a coorganiser of the exhibition. Association of European Business supports consolidation of exhibition operators in the market of car components and spare parts and believes that this initiative will contribute to further improvement of the exhibition significance at the international level and development of automotive industry in Russia.

The exhibition aimed at professionals of the industry will provide specialists with a unique opportunity to get acquainted with new products and establish long-term and commercially beneficial partnership relations. This exhibition features all integral parts of automobiles: spare parts, components, tyres, disks, accumulators, oils and lubricants, paints, car care products, garage and service equipment, manual tools and accessories.

I wish participants and guests of the exhibition productive work and new mutually beneficial contracts.

Frank Schauff
General Director
